(215) 697-9510

EPA/CPL Representative: George H. Houghton
Engineering Technician

EPA Region III requested assistance from the Central Regional Laboratory for groundwater sampling at the subject Superfund site.

A total of eight (8) wells were sampled during the two day effort. Three (3) of the wells were recovery wells (RW). These wells have their own dedicated pump and run almost constantly. Samples were collected from either a tap on the effluent line or at the discharge pipe from the well.
